## EDUCATION

---

**Master of Science, Mechanical Engineering, Spring 2022**  
Florida State University

Tallahassee, FL

**Bachelor of Science, Aerospace Engineering, December 2018**  
The University of Texas at Austin

Austin, TX

## EXPERIENCE

---

**Graduate Research Engineer, Florida State University**

**08/2019 – present**

- Operated a high-pressure anechoic facility with stagnation temperatures up to 1500 K, generating supersonic jets up to a fully expanded Mach number of 2.5.
- Produce flow visualizations through recognized techniques such as Shadowgraph, Schlieren, and Particle Image Velocimetry (PIV)
- Recorded and Analyzed data obtained using a variety of transducers to obtain spectral characteristics and recognize the acoustic capabilities of various types of nozzles and forms of active & passive flow control
- Exposure to high Overall Sound Pressure Level (OASPL) sounds and experience on how to mitigate and control
- Analyze continuous time signals and perform digital signal processing on discrete time signals
- Author of conference and peer-reviewed journal papers and technical instructions/documentation

**Research Assistant, The University of Texas at Austin**

**12/2016 – 12/2018**

- Initiated new process of data collection which increased efficiency from 92% to 100% through innovation of the LabVIEW software that controls the mechanical devices, instruments, and transducers, data collection units, and tanks that govern the Mach 1.8 wind tunnel
- Integrated a system of high-pressure jet streams, in conjunction with a ramp contained within the wind tunnel to introduce pressure perturbations into the flow
- Construct a PID controller to maintain the location of the shock train in the face of pressure disturbances regardless of frequency or magnitude
- Build hardware and software applications to further understand flow properties and analyze physical behaviors

## ACADEMIC & LEADERSHIP EXPERIENCES

---

**Chief Engineer, Aircraft Design, The University of Texas at Austin**

**01/2018 – 05/2018**

- Managed a team of 8 engineers to meet requirements, such as wing loading, payload, mass, speed, duration, risk assessment, sizing, and power, as requested by the customer in the RFI
- Evaluated control surfaces, electrical connections & wires, sensors, and autopilot systems
- Performed risk assessment and generated risk mitigation protocols
- Developed an Unmanned Air System (UAS) capable of following a flight path for assistance with fire & rescue emergency services via surveillance and payload drops

**President, The University of Texas Water Ski Team**

**11/2016 – 11/2017**

- Coordinated 60 members with a 10-person executive officer board to produce new forms of revenue, established a modern website, designed advertisements to accentuate the team brand across the nation
- Oversaw use of \$55,000 to lease a competition ski lake, procure new equipment, uphold and maintain a boat, cover traveling & accommodation costs, and restructured merchandise acquisition and distribution

# Yousef Saleh

(512) 815-4237 | [ysaleh@fsu.edu](mailto:ysaleh@fsu.edu)  
[YousefSaleh.com](http://YousefSaleh.com) | [in/YousefSaleh](https://www.linkedin.com/in/YousefSaleh)

- Refocused the team towards competitiveness and recruited a coach to accelerate individual growth
- Develop a long-term plan for the growth of the team and talent development

## SKILLS

---

- Experienced with C, MATLAB, Python, SOLIDWORKS, LabVIEW, Office, HTML, CSS, JavaScript, oscilloscopes, lab equipment, active noise control, signal generators, anechoic chambers and their specifications
- Adept with high pressure systems, data acquisition, microphones, discrete and continuous time signal processes, labs, audio analysis, acoustic measurements using tools like B&K microphones, and digital signal processing
- Strong oral & written communication, Self-motivated, team leadership, time management, test automation, attention to detail, managing large sets of data, and problem solving
- Work independently or in teams and adapt communication methods
- Proficient with engineering management, scheduling, technical discussion, and explanation of complex concepts, passive noise control
- Fluent in Arabic and English
